Hi Neal,

The limiting factor in the use of these cameras is the need of an internet connection. We have Wi-Fi at the site but the range does not extend to our work area. I had considered the use of a hotspot but the wireless service related to data transmission is choppy and probably wouldn't support a video feed transmission. We will need to look into a hardwire solution of some sort. Long story short, please hold off on shipping the equipment below.

Thanks and have a good weekend.

-Pete

Thanks Neil. Peter is copied. He can give specifics on the plans with the cams.

Eric,

Both cams are available. Just a couple of questions.

Do you have WiFi at your site? (that is how the cams transmit video)

How are you planning on powering the cams? (hardline 120vac, generator, battery???)

Let me know your deployment plan. Hopefully we have the right stuff in the equipment room to get you up and running. If we don't you may have to buy a few things on-site.

Neil

**Subject:** Drop cams-Niagara Falls Boulevard Site

**Importance:** High

Good Morning All:

How is everyone doing?

We were hoping we could use the drop cams used at the Aberdeen training at the NFB site? We have poor visibility when our workers are in the hot zone. Please let us know the availability and if they could be shipped to the site.

I hope all is well.

Thanks

Regards,

Eric
